Software Engineer | Founder @SearchOver | Passionate Tech
Advocate | Empowering Personal Development & Business
Solutions

Lagos State, Nigeria

Summary

With a diversity of backgrounds in programming, engineering, and design—to networking, marketing, customer service, communications, sales, and leadership—this determined professional seeks to build a bridge between technology and personal development. The focus of this mission goes out to empowering people on all paths who embark on a tech journey while helping craft effective, tailor-made solutions to companies' specific challenges. Teaching in the modern technological era to lead a balanced life and provide nuggets of wisdom and beneficial tips for a happier, healthier, and more productive life with technology enrichment through a YouTube channel.

The channel centers on education and connection with a core philosophy that is bringing in groundbreaking, life-enhancing courses targeted toward increasing digital skills with more market value—showcasing a success rate as high as 80%. A course handcrafted for the curious mind, which yearns to understand the complexity of the modern world and, at the same time, open new opportunities.

Being extremely outgoing, full of passion in respect of networking, and great interest shows for cooperating with the newcomers in the sphere of tech business, experienced experts, and business leaders in the field—meaningful solutions that reverberate across various sectors while elevating the collective game. The ultimate basic goal is clear: to enhance and harness growth, innovation, and positive change in the tech landscape in all efforts.

Founder

March 2024 - Present (6 months)

Join our inclusive community dedicated to empowering members on their learning adventures. Access our cutting-edge technical and educational tools to elevate your expertise in programming, critical thinking, mathematics, design, entrepreneurship, and personal growth. Our courses and resources have garnered a whopping 92% satisfaction rate among students and members, resulting in boosted confidence, career progression, and greater fulfilment.

- Design and deliver state-of-the-art educational materials and tools for personal growth: Delivered a 30% increase in confidence levels among members with focused entrepreneurship and mathematics courses in just six months.
- Course creation on 20+ specialist courses in programming and design which resulted in a 40% improvement in project completion rates by members, hence establishing the habit of continuous skill development.
- Design an easy-to-use platform where over 500 community members can share learning experiences and drive the expression of peer-to-peer support and resource sharing toward personal growth initiatives significantly.
- Made a mentorship network whereby senior-level professionals have been matched with new learners, enhancing career growth opportunities for over 150 members with high accolades of creating highly valuable industry connections and insight.

Principal Software Engineer

August 2023 - Present (1 year 1 month)

- Built over 15 individual and commercial portfolios using VueJS for a number of my clients who aimed at managing services effectively and monitoring performance that turned into improved operational output by 80 per cent and the client satisfaction score.
- Taught more than 100 students aged from 7 to 60 years advanced level digital skills in Data Analysis, Frontend Development, Low-code solutions, and Sales Strategies to improve the employability and tech proficiency of participants.
- Clients' portfolios were engineered with a more user-friendly interface using VueJS to create a seamless performance tracking system. From this improvement, the company can reduce clients' inquiries by 40% and further increase user engagement.

- Built a series of digital skills workshops with 50+ participants, embedded hands-on learning activities, increased overall digital competency, and instilled confidence and knowledge of how better to use technology.
- Created 20+ custom customer portfolios using VueJS for responsive design; this dramatically impacted the increase in user engagement and the measurable decrease in client support requests.
- Integrate advanced technologies—AWS, EC2, and Kafka—into training modules and increase learning value to prepare students for modern business demands; 75% of the class moved into successful job placement.
- Initiated innovative educational tools and resources for personal growth; in only six months, the confidence level of members escalated to 30%, with specially targeted courses in entrepreneurship and mathematics.
- Concluded a comprehensive initiative of 20 courses specialized in programming/design, enhancing member engagement and having significantly improved project completion rates—indicative of a commitment to professional growth.

Nestlé

Information Technology Assistant

January 2023 - November 2023 (11 months)

Lagos State, Nigeria

- Managed a directed network system powering the day-to-day operations of over 200 users, ensuring enhanced process efficiency and increased sales productivity by rendering the communication channels and resources used by the team more effective.
- Put in place across all networked devices a continuous compliance monitoring system: the system is now live across more than 150 devices to ensure ongoing compliance in line with security standards and the latest protocols.
- Conducted a series of cyber security training for the entire IT staff, which improved incident response effectiveness by 30% and allowed the team to handle security threats in real-time more effectively.
- Custom centralized dashboard providing real-time insights into IT performance metrics in use across 10+ departments, promoting better decision-making and resource allocation across the organization.
- Launched an initiative to standardize IT asset inventory management that delivered a 25% reduction in discrepancies by introducing improved tracking methodologies and increased transparency and accountability within operations.

Top Universe

Frontend Engineer

June 2021 - November 2022 (1 year 6 months)

Lagos State, Nigeria

- Spearheaded Agile development cycles by leading bi-weekly planning and review meetings with developers and stakeholders; streamlined processes resulted in a 25% faster project completion timeline and improved team communication.
- Optimized web applications for maximum speed by implementing performance testing tools and debugging techniques; identified and resolved 15 critical bottlenecks, enhancing responsiveness across 10+ devices and improving user satisfaction ratings.
- Developed a robust AI Chatbot within a three-month timeframe, empowering 12 customer service representatives to automate responses and reducing average response time by 40%, while improving customer feedback scores.
- Implemented web application enhancements utilizing Python and Flask, resulting in a 30% reduction in server response time and enabling seamless scalability during peak usage periods for over 500 daily users.
- Analyzed and refined Kafka messaging protocols, increasing data throughput by 25% while maintaining data integrity; enhancements are now a standard part of the development workflow for all new projects.

Education

Crawford University

Bachelor of Applied Science - BASc, Information and Communication Technology · (2018 - 2022)
